Center for Maternal, Fetal and Neonatal Medicine Saitama Medical Center, Saitama Medical University

Since May 2014, we have been implementing the 1st and 2nd JICA projects in Chiang Mai Province, Thailand. Implemented at 26 hospitals in Chiang Mai, the petit CTG is a very effective remote fetal diagnostic model for pregnant women who are unable to visit the hospital under coronavirus infection. This lecture is the first in the world where the authority on perinatal care in Japan give remote lectures. If you are interested, please check out.
